6th Conference on Formal Power Series  
and Algebraic Combinatorics

FPSAC '94  
May 23-27, 1994

6<sup>ème</sup> Colloque Séries Formelles  
et Combinatoire Algébrique

SFCA '94  
23-27 mai 1994

ABSTRACTS

---

RÉSUMÉS

---

## Organizers/Organisateurs

L. Billera (Cornell University)  
R. Simion (The George Washington University, Chair)

C. Greene (Haverford College)  
R. Stanley (MIT)

## Program committee/Comité de programme

H. Barcelo (USA)  
F. Bergeron (Canada)  
L. Butler (USA)  
D. Gouyou-Beauchamps (France)  
P. Hell (Canada)  
J. Remmel (USA)  
V. Welker (Germany)

E. Barcucci (Italy)  
J. Berstel (France)  
J. Désarménien (France)  
C. Greene (USA)  
A. Kerber (Germany)  
R. Simion (USA, Chair)  
D. Zeilberger (USA)

M. Bayer (USA)  
L. Billera (USA)  
I. Gessel (USA)  
L. Habsieger (France)  
C. Lee (USA)  
R. Stanley (USA)  
G. Ziegler (Germany)

## Local arrangements/Comité d'organisation locale

G. Duchamp (Inst. B. Pascal) M. Holtsclaw (DIMACS) J. Kahn (Rutgers U.)  
J. Katinsky (DIMACS) A. Odlyzko (AT&T Bell Labs) R. Simion (George Washington U.)  
P. Toci (DIMACS) P. Winkler (BellCore)

## Reviewers/Arbitres

|                |               |                      |                   |
|----------------|---------------|----------------------|-------------------|
| R. Bacik       | H. Barcelo    | E. Barcucci          | A. Bartotti       |
| M. Bayer       | F. Bédard     | F. Bergeron          | N. Bergeron       |
| J. Berstel     | L. Billera    | A. Björner           | M. Bousquet-Melou |
| S. Brlek       | L. Butler     | C. Chan              | N. Crochemore     |
| J. Désarménien | S. Dulucq     | S. Fomin             | F. Galvin         |
| I. Gessel      | A. Goupil     | D. Gouyou-Beauchamps | C. Greene         |
| R. Grossi      | P. Gvozdjak   | L. Habsieger         | M. Haiman         |
| P. Hanlon      | P. Hell       | E. Ihrig             | D. Jackson        |
| F. Jaeger      | A. Kerber     | V. King              | D. Kirkpatrick    |
| V. Klee        | D. Krob       | G. Labelle           | C. Lee            |
| C. Lindner     | A. Del Lungo  | S. Mahajan           | F. Miller Maley   |
| B. Mühlherr    | J.-G. Penaud  | D. Perrin            | P.A. Picon        |
| N. Pippenger   | R. Proctor    | J. Remmel            | J. Richter-Gebert |
| R. Simion      | R. Sprugnoli  | S. Stahl             | R. Stanley        |
| D. Stanton     | J. Stembridge | B. Sturmfels         | S. Sundaram       |
| J.Y. Thibon    | C. Verri      | V. Welker            | D. White          |
| G. Williamson  | D. Zeilberger | G. Ziegler           | R. Zivaljevic     |
| A. Zvonkin     |               |                      |                   |

## Translation of abstract summaries/Traduction des résumés

The authors and H. Barcelo, G. Duchamp, L. Habsieger, R. Simion, S. Sundaram.

## Acknowledgement of support/Appui financier

This conference is made possible through funding provided by Rutgers University, DIMACS, and the National Science Foundation.

TABLE OF CONTENTS — TABLE DES MATIÈRES

|   |     |
|---|-----|
| Ron Adin  |     |
| <i>A new cubical <math>h</math>-vector</i> .....  | 1   |
| Tatiana Alekseyevskaya  |     |
| <i>Combinatorial bases in systems of simplices and of chambers</i> .....                          | 11  |
| Nantel Bergeron   |     |
| <i>About Hochschild homology</i> .....  | 23  |
| Laurence Bessis   |     |
| <i>Harvey-Wiman hypermaps</i> .....   | 33  |
| Anders Björner  |     |
| <i>Shellability – a nonpurist view</i> .....  | 43  |
| Francesco Brenti  |     |
| <i>A combinatorial formula for Kazhdan-Lustig polynomials</i> .....                               | 45  |
| Ruth Charney  |     |
| <i>Metric geometry: connections with combinatorics</i> .....                                      | 55  |
| Ivan Constantineau* et Gilbert Labelle  |     |
| <i>Une généralisation automorphe des nombres de Stirling</i> .....                                | 59  |
| Maylis Delest   |     |
| <i>Langages algébriques: une visite à la frontière entre informatique et mathématiques</i> .....  | 69  |
| Alberto Del Lungo, Maurice Nivat et Renzo Pinzani   |     |
| <i>Polyominoes convexes définis par un couple de vecteurs</i> .....                               | 79  |
| Alain Denise  |     |
| <i>Enumération et génération aléatoire de chemins</i> .....                                       | 91  |
| Kequan Ding   |     |
| <i>Rook placements and partition varieties <math>P_\gamma \setminus M_\lambda</math></i> .....    | 99  |
| Jean-Philippe Dubernard et Isabelle Dutour*   |     |
| <i>Enumération de polyominoes convexes dirigés</i> .....  | 109 |
| Serge Dulucq et Olivier Guibert*  |     |
| <i>Mots de piles, tableaux standard et permutations de Baxter</i> .....                           | 119 |
| Ömer Eğecioğlu* and Teofilo Gonzalez  |     |
| <i>A computationally intractable problem on simplicial complexes</i> .....                        | 129 |
| Richard Ehrenborg and Margaret Readdy*  |     |
| <i>Juggling and applications to <math>q</math>-analogues</i> .....                                | 135 |
| Henrik Eriksson* and Kimmo Eriksson   |     |
| <i>Chip-firing and Coxeter elements</i> .....   | 145 |
| Kimmo Eriksson  |     |
| <i>Reduced decompositions in affine Coxeter groups</i> .....                                      | 153 |
| Svetlana Feretić* and Dragutin Svrtač   |     |
| <i>Combinatorics of diagonally convex directed polyominoes</i> .....                              | 163 |
| Susanna Fishel  |     |
| <i>Statistics for special Kostka polynomials</i> .....  | 173 |
| Sergey Fomin* and Anatol N. Kirillov  |     |
| <i>Grothendieck polynomials and the Yang-Baxter equation</i> .....                                | 183 |
| Markus Fulmek* and Christian Krattenthaler  |     |
| <i>Lattice path proofs for determinantal formulas for symplectic and orthogonal characters</i> .. | 191 |
| Jennifer Galovich* and Dennis White   |     |
| <i>Generalizations of Denert's statistic</i> .....  | 201 |
| Vesselin Gasharov   |     |
| <i>Incomparability graphs of <math>(3+1)</math>-free posets are <math>s</math>-positive</i> ..... | 211 |
| Roland Häggkvist and Jeanette Janssen*  |     |
| <i>All-even latin squares</i> .....   | 217 |

*(continued . . . suite au verso)*

|  |     |
|--|-----|
| Phil Hanlon  |     |
| <i>Combinatorial problems connected to the homology of Lie algebras</i>  | 223 |
| Patrick Headley  |     |
| <i>On reduced words in affine Weyl groups</i>  | 225 |
| Joseph Hemmeter, V.A. Ustimenko, and Andrew Woldar*  |     |
| <i>Intersection numbers, eigenvalues and fusion in the orbital scheme <math>B_{3,2}(q)</math></i>                            | 233 |
